LEGACY IN EVERY **ANIMAL**. EXCELLENCE IN EVERY **GENERATION**.

INTRODUCING THE:

Goats Window Buffalo Stud

35+ Bulls Over 50" | Proven Pedigree | Investment-Grade Genetics

Goats Window is proud to unveil a defining milestone in wildlife breeding: the Goats Window Buffalo Stud. We have assembled one of Southern Africa's most formidable collections of elite Cape Buffalo; anchored by an extraordinary foundation of over 35 buffalo boasting verified 50"+ horn spreads.

In an industry where 50 inches represents the ultimate benchmark, a concentration of this caliber is virtually unheard of. Every cow and breeding bull has been hand-selected not merely for Rowland Ward (RW) and SCI trophy metrics, but for proven prepotency; the ability to pass down exceptional horn growth, deep body volume, and resilient maternal traits. Paired with industry-defining sires, every calf represents a measurable step forward in market prestige and long-term capital appreciation.

This isn't just a breeding operation; it is a concentration of rare genetic capital. A legacy asset designed for serious investors, visionary breeders, and custodians of Africa's finest wildlife.
